WELCOME

**AID & INTERNATIONAL
DEVELOPMENT FORUM**

June 8-9 2011 | Washington D.C. USA

Within this guide you will find all the information you need regarding the exhibition, workshop sessions, pitch tanks and experiential zones.

This year's Aid & International Development Forum (AIDF) will follow a slightly different format and will be divided into sectors of response or Cluster Zones in line with humanitarian reform, addressing gaps and strengthening the effectiveness of humanitarian response through partnerships. Each Cluster Zone will address a different topic with dedicated exhibits, networking opportunities, workshop and experiential sessions.

AIDF is an opportunity for the aid, relief and development sectors to come together to network and build partnerships in order to cohesively address these global humanitarian and development challenges. AIDF is more than a talk shop. It is a showcase of goods and services at the forefront of delivery. We encourage you to see all the exhibits and attend our cocktail reception on the evening of the 8th to build relationships with as many individuals and organizations as possible.

Within the workshop sessions, you will find expert speakers discussing the challenges they've faced, and the effectiveness of aid solutions in the disaster relief and development sector. There are a number of informative sessions framed around Cluster Zone sectors of response, such as ICTs, transport and logistics, shelter, education, finance and many more. Our partners (USAID, the Millennium Challenge Corporation, the Pulitzer Center, the International Stability Operations Association, and GVF) will also be holding interesting and stimulating sessions looking at partnering to respond to disasters and emergencies, risk management, disaster reporting and responding, governance and capacity building, and disaster preparedness.

This year's interactive experiential zones will focus on the Japan earthquake and tsunami, the Pakistan floods and the situation in Southern Sudan. Visitors will be able to interact with the products on show and discuss the issues in the aftermath of each scenario looking at how they were dealt with and how this could be changed should a similar situation occur again.

There is also the opportunity for companies to pitch their products to procurement and logistic officials in the pitch tanks and to receive valuable feedback from the panel on their products and presentation. The pitch tanks are intended to enhance understanding between government, UN, NGOs, procurement agencies and companies supplying goods and services to the aid, humanitarian relief and development sectors

The AIDF team is available to assist you and to ensure you have a successful event. We hope that you share learning, gain experience and build valuable relationships with colleagues within the sector.

WORKSHOP SESSIONS IN DETAIL

Workshop A

Wednesday 8th June, 2011

Innovation in information: ICTs, power & energy efficiency

10:00am – 11:00am

Innovation in information and communications technology is providing humanitarian emergency responders with new tools to carry out their life-saving operations. As the technology available becomes more advanced, so too do the solutions in which they are employed. Emergency operations demand involvement from numerous players, from UN agencies and NGOs, to governments and private companies. This session will provide a brief overview of some of the new solutions available to assist in disaster response, how we can evaluate them and how these key players are working together to develop them. It will also look at decentralized energy as a means of achieving universal access to energy.

[New technologies and solutions in humanitarian emergency response](#)

Alf Ellefsen, *Regional ICT Officer for USA, Central and Latin America, World Food Programme (WFP)*

[Capacity and chaos: the real impact of ICT deployment during crises](#)

Joe Donahue, *Chief Executive Officer, iMMAP*

[Evaluating technology for disaster relief](#)

Keith Robertory, *Disaster Services Technology Manager, American Red Cross*

[The role of decentralized energy in achieving universal access to energy](#)

Dr. Mary Jeanette (MJ) Ebenhack, *President, AHEAD Energy (Moderator)* &
David Sweet, *Executive Director, World Alliance for Decentralized Energy (WADE)*

[The humanitarian social network](#)

Elliott Verreault, *CEO, It'sOneHumanity*

Moving mountains: effective transport and logistics

1:30pm – 2:30pm

Sponsored by

Food, medical equipment, shelter solutions, relief supplies, personnel. Transporting and organising essential supplies for aid, relief and development at an affordable price requires organisation, preparation, coordination and collaboration between all actors. This session brings together transportation and logistics professionals from the Government, NGO and private sectors to discuss programs in place and gaps that exist.

USAID logistics

John Abood, *Team Leader / Contracting Officer, Transportation Division, Office of Acquisition and Assistance, U.S. Agency for International Development (USAID)*

Supply chain solutions to the humanitarian sector

Governor Scott McCallum, *President and CEO, Aidmatrix Foundation (Moderator)*

Logistics delivery

John Brough, *Global Head, Aid & Relief Services Sector, DHL*

Humanitarian air transportation program

Ty Prettyman, *Program Director, ISTAT AirLink Program*

Shelter: The big picture

2:45pm – 3:45pm

Permanent, sustainable shelter is the ultimate aim, but following disaster there is an urgent need for immediate response solutions. This session discusses the role of the aid agency in designing and delivering shelter solutions that suit the communities they serve, the budgets they have and the future they can support. Looking at the “Pathways to Permanence” approach, the group also consider the contribution shelters, houses and community buildings can make to climate change.

Shelter - the “big picture”

Graham Saunders, *Head of Shelter, International Federation of Red Cross (IFRC) (Moderator)*

J Margaret Burke, *Director, Management Services, Africare*

Contextual application of shelter design

Mustafa Omar, *Executive Director, Shelter for Life International*

Sustainable shelter

Ben Sandzer-Bell, *Founder and CEO, CO2 Bambu*

Pathways to permanence - an incremental approach to disaster response

Kip Scheidler, *Senior Director, International Disaster Response, Habitat for Humanity*

Meeting challenges and creating opportunity through neighborhood - based shelter assistance in urban recovery

Meredith Sisa, *Acting Director, CHF International office of Humanitarian Assistance*

Workshop B

Wednesday 8th June, 2011

Partnerships: how to achieve more together

10:00am - 10:30am

In tight financial times, partnering is often a requirement for survival and success. Look around this exhibition and find more opportunities than simply buying and selling. Look for partners. Forming partnerships within and across NGO sectors, with vendors and public agencies can create new, sustainable solutions to some of the disaster and development problems NGO's were formed to address. Partnerships can also take those solutions to the scale required to solve rather than simply hold at bay the problems. How do you identify, assess and develop potential partnerships? How do you select a good partner? How do you manage a partnership to success? Learn more about an approach to achieving more together than you can alone.

Charley Ansbach, *CEO*, California Association of Nonprofits (Moderator)

Christina Ragsdale, *Head of Communications*, Sacramento Air Quality Management District

Partnering to respond to disasters & emergencies

10:45am - 11:45am

The U.S. Agency for International Development (USAID) has a long history of responding to a range of emergency situations including natural disasters and complex emergencies around the globe. Corporations and other institutions can play a pivotal role in assisting the U.S. Government in responding to crises. There are many ways in which public-private partnerships can be successfully utilized throughout the various phases of disaster response – preparedness, acute response, recovery, reconstruction and transition. This workshop will explore how USAID builds alliances for disaster response and the critical roles private sector partners can play in responding to crises.

Todd Kirkbride, *Senior Alliance Advisor*, Office of Development Partners/Private Sector Alliances Division, USAID (Moderator)

Carolyn Brehm, *Vice President*, Global Government Relations, Procter & Gamble (P&G)

Ted Okada, *Director of U.S. Global Strategic Accounts*, Microsoft

When disaster strikes: reporting and responding

12:00pm – 12:30pm

Earthquakes, epidemics, oil spills, war. Whether wrought by nature or man, disasters happen and two groups arrive often nearly simultaneously but with distinct interests. Humanitarian workers determined to help in any way. Journalists determined to record history unfolding. Frequently these groups collide despite a symbiotic relationship. Aid workers need journalists to convey the disaster's dimensions. Journalists rely on public health specialists to provide information, context and real-life narratives to make a crisis come alive. Through the prism of its full-cycle model of reporting and issue-awareness campaigns, the Pulitzer Center on Crisis Reporting will use this workshop to explore the collaboration and tension between journalists and aid workers and consider strategies to allow these two groups to function collaboratively.

Nathalie Applewhite, *Managing Director*, Pulitzer Center on Crisis Reporting

Deena Guzder, *Journalist*, Pulitzer Center on Crisis Reporting

Haiti, 1.5 years on: lessons learned and current progress

2:15pm – 3:15pm

This session will look at how Haiti can be rebuilt in a more sustainable, effective way since the 2010 earthquake and opportunities for new, safer techniques and practices. Firstly speakers will look at shelter, the greatest remaining challenge in Haiti, at the building of safer, stronger buildings and the move beyond repairing houses to rebuilding neighborhoods. It will also examine child protection in Haiti - changing the paradigm for child welfare and protection of Haitian children by strengthening the capacity for local workforce; collaborating with the local and national government; involving the community to ensure buy-in of the community and ownership of projects. In a move to increase transparency, cohesive working and co ordination, InterAction will also present the 'NGO Aid Map'. Participants will share their experiences and discuss solutions for the future.

Dominique Toussaint, *Chairman of the Board*, Mobilize for Haiti (Moderator)

John Leach, *Head of Operations*, ShelterBox

Michael Klosson, *Vice President, Policy and Humanitarian Response*, Save the Children

Risk management - MCC Compact Country Programs

3:30pm – 4:00pm

Chris Williams, a Director in the Investment and Risk Management Division of the Millennium Challenge Corporation (MCC), will discuss MCC's experience in identifying, assessing, and managing risk when developing large-scale grants, or compacts, with recipient countries, and in supporting those countries in doing the same during program implementation. He will describe tools and approaches both used by MCC and recommended by MCC to its partners.

Christopher Williams, *Director*, Investment and Risk Management Division, MCC

Governance and capacity building as a humanitarian imperative

4:15pm -4:45pm

While humanitarian response spans a wide range of operations from aid delivery to temporary shelter to training and preparedness, a successful humanitarian operation also depends heavily on local capacity and existing governance structures. Join the editor and authors from the Journal of International Peace Operations for a targeted discussion on the latest issue featuring articles on governance and capacity building as keystones to successful humanitarian operations.

Complex conflicts: protection and security

5:00pm – 6:00pm

This session will discuss the effectiveness of current security and protection solutions in the disaster relief and development sector and look at current trends and how they can be improved/ adapted to increase coordination and a better approach between the UN, NGOs, government and the private sector. Speakers will look at citizens' role in addressing disaster situations, a coherent approach, child protection in conflict situations and working in increasingly complex situations.

How are citizens taking the lead in preparing for, responding to and recovering from disasters?

Governor Scott McCallum, *President and CEO*, Aidmatrix Foundation (Moderator)

Building partnerships for security and safety in complex emergencies

Syed Sharfuddin, *CEO*, Muslim Aid

Ralph DiTrocchio, *Founder & President*, Civil Solutions International

Child protection mainstreaming

Martin Hayes, *Child Protection Specialist*, ChildFund International

Managing risk through the use of traveller welfare technology and an effective 'Travel Safety Policy'

Steve Summers, *CEO*, Key Travel

Preparing for the Unpredictable

Earthquakes, tsunamis, and hurricanes from Haiti to Japan to America's own Gulf Coast remind us that every nation is susceptible to nature's devastating fury. America's benevolence extends to all persons in countries facing cataclysmic events, and the United States military routinely aids countries recovering from natural disasters with immediate support.

During mass evacuations the complexities of moving large groups of people during stressful situations remains the most probable point of mission failure. Shelter locations overflow, people are diverted, families are separated, and critical supplies don't reach those who need them most. The best laid Disaster Preparation Plans simply cannot avert the chaos of a natural disaster, any more than we can stop a tsunami, hurricane, or earthquake.

Nimble Reaction Disaster Management

EWA^{PHOENIX}™ web-based software is a proven tool that accounts for citizens before, during, and after natural disasters. Its rapid registration process provides the ability to tag and track citizens and critical belongings during evacuations from entire cities or coastal regions. Using handheld devices, EWA^{PHOENIX}™ rapid registration technologies can be configured to import data from government issued ID's. It takes only minutes to register an entire family so that even if they are separated, EWA^{PHOENIX}™ can find them. If ID's are not available, it takes only a few minutes more to manually register a family.

EWA^{PHOENIX}™ provides nimble flexibility to effectively manage the unpredictability of immediate evacuation activities, and is scalable to accommodate large and complex evacuation operations. Transportation and shelter assets as well as aid supplies can be pre-identified and registered within EWA^{PHOENIX}™ even *en route* to a disaster site. As citizens are registered during an evacuation, disaster support personnel can proactively manage transportation and shelter availability, and effectively distribute critical supplies.

A web-based solution, EWA^{PHOENIX}™ is free from any reliance on hard-wired infrastructures. Information collected from handheld devices is captured, managed, and shared with evacuation teams and also with organizations outside the normal communication lines. Emergency managers can provide public officials with timely and accurate information about their citizens, to include locating U.S. citizens and communicating with State Department offices. Shelter and transportation manifests are easily emailed to organizations providing mutual aid and support.

Today, EWA^{PHOENIX}™ is being used in the trenches to help our customers, like Louisiana, Virginia, Indiana and Mobile County Alabama, prepare with diligence and forethought, respond with confidence and greater capability, and recover faster. We can provide you with these same capabilities to serve and secure your citizens.

Workshop A

Thursday 9th June, 2011

Developing finance: transparency and good practice

9:30am – 10:30am

This session looks at the management reconstruction and development relief funds, contributions and good practice. Panellists address questions such as: How can transparency be maintained and corruption be addressed? What are the benefits of Gifts in Kind vs financial contributions? What defines transparency and good practice in the implementation of Gifts in Kind and how can a country's Public Financial Management (PFM) system best manage the post-disaster reconstruction relief funds.

Humanitarian corruption risks

Shruti Shah, Senior Policy Director, Law and Regulation, Transparency International USA

GIK – transparency and good practice

Andrew Thorburn, *Founder*, Global Benefits Group Foundation & **James Lanning**, *Director of Acquisitions and Logistics*, International Relief and Development

Public financial management systems for disaster relief & development

Implementing procurement efficiency to eliminate program waste and delays

Vineet Luthra, *Founder and CEO* & Tim Murphy, *Vice President*, Procurement Transformation Services, PrivatIn

Japan: assessment and current progress

10:45am – 11:45am

This session will look at the practical and logistical challenges experienced in providing and distributing aid relief such as: shelter; healthcare; food, fuel and power to Japan in the aftermath of the 2011 earthquake. It also looks at building local capacity of organizations to promote psychosocial well-being, teaching helpers about normal reactions, coping strategies, linking people to needed services, as well as staff self-care.

Ty Prettyman, *Program Director*, ISTAT AirLink Program

Japanese Red Cross Society relief and recovery activities for the Great East Japan Earthquake

Mark Preslan, *Regional Director for Asia-Pacific / Middle East / Europe*, International Services Department, American Red Cross

Fuel for disaster relief

Feeding development: nutrition and sanitation

1:00pm – 2:00pm

How are NGOs, aid agencies, government and UN organizations meeting the challenge of food poverty? Panelists will share examples of their work including The Global Foodbanking Network, FareShare, how supply chain technologies are helping America feed its most vulnerable citizens, USAID Forward, education and health programs. MCC will discuss their largest grant vehicles called Compacts, specifically focusing on water and sanitation.

[USAID forward programs](#)

John Abood, *Team Leader / Contracting Officer*, Transportation Division, Office of Acquisition and Assistance, U.S. Agency for International Development (USAID)

[MCC grant vehicles](#)

[Solar water purifiers](#)

Dave Moser, *Vice President, Business Development*, Puralytics

[Meeting the challenge of food poverty](#)

Terri Hasdorff, *Vice President*, The Aidmatix Foundation

Integrated education: minimizing crises

3:15pm – 4:15pm

Education is fast becoming seen as an important tool in humanitarian response situations – not only to save lives, restore normality and to give hope for the future but also to avoid crises and reduce their impacts. All panellists recognise the importance of partnerships between governments, the private sector and local populations. Here they discuss how to help schools and learning institutions in the development of methods, curriculums, health, safety and learning for better wellbeing.

GVF SUMMIT

Workshop B

Thursday, 9th June 2011

Disaster preparedness summit: establishing harmonized multi-sector ICT disaster preparedness & development solutions

Welcome & Introduction by David Hartshorn, Secretary General, Global VSAT Forum (GVF)

09:30am – 09:45am

From hurricanes to earthquakes, from civil wars to terrorist attacks, the brutal calculus of cost – whether it's measured in financial terms or in human lives – is being mitigated through new collaborative efforts of stakeholders in the public and private sectors. This is particularly evident in the way that satellite, wireless and other ICT solutions are being applied to address mission-critical disaster preparedness and humanitarian and aid requirements. David Hartshorn will welcome all delegates to participate in the event's open-forum discussions and to identify means by which preparedness and development can be further advanced through examination of priorities and roles, as well as closer collaboration amongst key stakeholder groups.

Disaster preparedness summit: establishing harmonized multi-sector ICT disaster preparedness & development solutions

09:45am - 11:15am

The historical role for foreign ICT resources and coordination in disaster response has been to enable the communication between individual response organizations and their colleagues abroad. Have we been focussing on connectivity instead of communications between organizations? Should the emergence of social media as a critical resource for gathering information from survivors cause us to revisit our ICT response goals? Are we providing effective support to critical infrastructure operators in the affected area?

Many stakeholders agree that the creation of a collaborative information environment can be achieved if multiple stakeholder groups are sensitive to one another's concerns.

Resources can be more closely coordinated not only for preparedness and first-responder efforts, but also for mid- and long-term reconstruction. These options increasingly include "leave-behind" infrastructure for local partners, whether they be private, governmental, or non-governmental

agencies. Depending on local regulations and capability constraints, leave-behind infrastructure can be used to jump-start host-nation ICT infrastructure recovery and reconstruction, and provide commercial opportunities to seed economic revitalization through ICT infrastructure development.

Al Johnson, *NII-OSD, ICT Director, U.S. Department of Defence*

Alf Ellefsen, *Regional ICT Officer for USA, Central and Latin America, World Food Programme (WFP)*

Paul Chiswell, *Senior Director, Customer Assurance Program, Cisco and Chair, US State Department ACICIP Disaster Management Sub-Committee*

Morning Q&A

11.:15am – 11:45am

Break for lunch and look around the exhibition

11:45am – 1:15pm

ICT for disaster preparedness & development: the state of the art

1:15pm – 3:00pm

The current ICT default for first responders' disaster preparedness capability is similar among most disaster preparedness stakeholder groups, having been pre-configured with a range of portable sets that include satellite phones, data terminals, and other tools. These approaches enable first responders to quickly deploy at the disaster site and establish communications back to their respective home organizations, with needs assessments and logistical information.

However, there is little in the way of local communications between those based in the disaster zone. Further, for the most part, disaster response stakeholders often do not have an ICT approach that addresses the more robust on-the-ground collective solution that can also be transitioned into a medium and longer term infrastructure with scale capabilities or that can eventually be transitioned into a permanent, locally-operated, commercial enterprise.

Coordination challenges span differences in culture, language, organization, training and education, doctrine, planning and analysis, and communications and information systems.

Unfortunately, old business models and restrictive policies continue to be applied to support what have become highly dynamic, collaborative needs and requirements in complex operations. In spite of multiple "lessons learned" reports from past experiences, many of the same issues continue to confound the response community in each deployment. This open forum dialogue aims to address that challenge.

This session will explore the extent to which NGOs, UN aid agencies, the private sector, the military, and other stakeholders are applying complementary approaches that can more effectively satisfy these requirements.

Joe Simmons, *International Program Coordinator, NetHope*

Paul Margie, *US representative, Télécoms Sans Frontières*

Joe Duncan, *Global Broadband Initiative Program Director, Technology Transfer Team, USAID,*

Evelyn Cherow, *CEO, Global Partners United*

Darrell Owen, *Global Broadband Initiative, USAID*

Domestic perspectives: the American Red Cross Response Strategy

3:00pm – 3:30pm

Keith Roberatory, *Disaster Services Technology Manager, American Red Cross*

Moderator Q&A – David Hartshorn, Secretary General, Global VSAT Forum

Public Private Partnerships

3:30pm – 4:30pm

The tightening of budgets in recent years has led to a re-examination of the role of the private sector in disaster response. Often in the past, they were called upon only once an event occurred to provide support. This reactive nature has often led to misunderstandings and challenges in providing an effective response. Increasingly, the private sector are seen as a real partner at the table from the planning and preparedness through to effective recovery. The role played by the private sector in Haiti, Japan, China and in other recent disasters has shown that agencies need to involve the private sector and other partners, and that this can be without undermining either the neutrality of civilian international organizations, inter-governmental organizations and NGOs.

Jim Ramsey, *President, MTN Government Services*

Tamara Dias, *Regional Sales Manager, Thrane & Thrane, Americas*

PITCH TANKS IN DETAIL

Workshop A

Wednesday 8th June, 2011

The pitch tanks are intended to enhance understanding between government, UN, and NGO organisations, procurement agencies and companies supplying goods and services to the aid, humanitarian relief and development sectors. A small number of companies will present their products allowing procurement and logistics professionals to give feedback on whether the product and presentation are suitable for the environment, for the situation, for the budget and for logistical constraints. This will allow both companies and agencies to gain information on what works and what does not.

ICTs, power & energy efficiency pitch tank

11:15am – 12:00pm

Panellists

Carla Mendizabal, *Logistics Officer, Canadian Red Cross*

Vineet Luthra, *Founder and CEO, Privatin*

Presenting Companies

Jonathan Bamber, *International Development Sales, Tough Stuff*

Kristine Pearson, *CEO, Lifeline Education*

Stewart Jones, *International Business Development Director, True Energy*

Stephen Katsaros, *Founder/Inventor Nokero*

Shelter pitch tank

4:45pm - 5:30pm

Panellists

Graham Saunders, *Head of Shelter, International Federation of Red Cross (IFRC)*

Mustafa Omar, *Program Development Manager, Shelter for Life International*

Carla Mendizabal, *Logistics, Canadian Red Cross*

Shamalinee Gunawardena, *Senior Logistics Officer, Canadian Red Cross*

Presenting companies

Ben Sandzer-Bell, *Founder and CEO, C02 Bamboo*

Roland Lusk, *President, Shore Tech Manufacturing*

Dr. Gerald Bidawid, *President, International Industrial Medical Group*

Workshop A

Thursday, 9th June 2011

Health & sanitation pitch tank

2:15pm - 3:00pm

Panellists

John Abood, Team Leader/Contracting Officer for the Transportation Division of USAID

Mike McEntire, Director, Program Procurement Policy, Millennium Challenge Corporation

Shamalinee Gunawardena, Senior Logistics Officer, Canadian Red Cross

Presenting Companies

Stewart Jones, International Business Development Director True energy

Christina Keller, Business Unit Leader, Tripple Quest.

Mrs Karin Ruiz, CEO, Peepoople AS

Dave Moser, Vice President, Business Development, Puralytics

EXPERIENTIAL ZONES

The Experiential Zones showcase the application of the latest products, technologies and services in a series of real-life scenarios based on past, present and ongoing crises. Visitors will be able to interact with the products on show and discuss the issues in the aftermath of each scenario looking at how they were dealt with and how this would be changed should a similar situation occur again.

Come and learn, share your knowledge, and experience solutions that can change and help manage disaster situations now and in the future.

**JAPAN
EARTHQUAKE
AND
TSUNAMI**

**PAKISTAN
FLOODS**

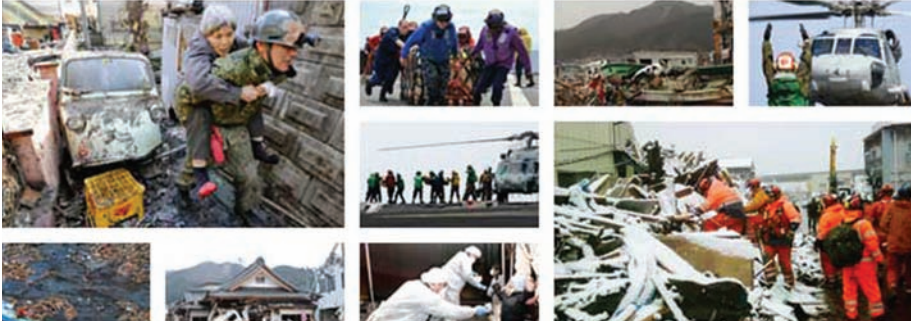

**SOUTHERN
SUDAN**

Japan Earthquake and Tsunami

Wednesday 8th, June 10:00am - 11:00am and Thursday 9th, June 1:00pm - 2:00pm

On March 11, 2011 a 9.0 magnitude earthquake struck the north-eastern coast of Japan, triggering extremely destructive tsunami waves which hit Japan just minutes after the earthquake, leading to evacuations and warnings across the Pacific Ocean. The earthquake and tsunami have caused extensive and severe damage in north-eastern Japan, leaving thousands of people confirmed dead, injured or missing, and millions more affected by lack of electricity, water, shelter and transportation. How can communications systems be set up on the ground amongst the devastation? Where does the power come from to aid rescue and reconstruction when infrastructure has been destroyed? How can aid organisations protect their employees? What solutions exist for fast and yet secure temporary housing? And how can we address the psychological needs as well as the physical needs of the affected population in the wake of such death and destruction?

The following organisations and speakers will bring this situation to life:

F4W Inc will demonstrate the Core PSI communications kit which provides the secure voice and data connection you need to stay in touch when it matters the most

Key Travel will be demonstrating their 'Wellbeing Suite' which offers a range of products designed to give employers, family members, and travellers themselves peace of mind when it comes to their safety and wellbeing whilst on the move

Shelter Box will demonstrate how they provide emergency shelter and lifesaving supplies for families around the world who are affected by disasters at the time when they need it the most

Civil Solutions International will discuss how modern day Civil Affairs can be applied to the entire disaster recovery / humanitarian lifecycle and help an overwhelmed host nation speed up the recovery efforts in the first world

Johnson Portables will demonstrate how quickly and intuitively the hard walled Building in a Box™ system can be erected to provide medical, living or office space

Governor Scott McCallum, President & CEO, The Aidmatrix Foundation (Moderator)

David Eby, Program Director, Shelter Box

Inka Weissbecker, Global Mental Health and Psychosocial Advisor, International Medical Corps

Pakistan Floods

Wednesday 8th June, 1:30pm - 2:30pm and Thursday 9th, June 2:30pm - 3:30pm

The Pakistan floods began in late July 2010, as a result of heavy monsoon rains in the Khyber Pakhtunkhwa, Sindh, Punjab and Balochistan regions of Pakistan and affected the Indus River basin. Approximately one-fifth of Pakistan's total land area was underwater, partially or wholly destroying more than 1.6 million homes and causing approximately \$10 billion of direct and indirect losses, half of which were borne by the agricultural sector alone. The size and scale of the disaster is difficult to conceive. Approximately 20 million people were affected, 14 million of whom needed urgent humanitarian assistance. How can aid agencies be sure that their employees are safe in a volatile land? How can communications devices remain powered in the absence of a national grid and how can sanitation solutions prevent the spread of disease? How can lighting be provided at affordable prices for safety, development and learning, and how can shelter providers serve these people in need?

The following organisations and speakers will bring this situation to life:

Key Travel will be demonstrating their 'Wellbeing Suite' which offers a range of products designed to give employers, family members, and travellers themselves peace of mind when it comes to their safety and wellbeing whilst on the move

Tough Stuff will show how to enhance connectivity and access through solar mobile phone charging

Peepoople will demonstrate their self-sanitizing single-use biodegradable toilet - the Peepoo - a new solution for immediate disease prevention on a massive scale

Nokero will present their solar bulbs which are designed to be durable, long-lasting, portable and affordable to energy poor communities around the world

Shelter Box will demonstrate how they provide emergency shelter and lifesaving supplies for families around the world who are affected by disasters at the time when they need it the most

IIMG will present their temporary housing structures which can be utilized for many purposes - for example as hospitals, schools and offices

Adnan Ansari, Vice President, Islamic Relief (Moderator)

Mark Pearson, Field Operations Specialist, Shelter Box

Deena Guzdar, Journalist, Pulitzer centre

Anwar Khan, Vice President of Fund Development, Islamic Relief

Southern Sudan

Wednesday 8th, June 3:30pm - 4:30pm and Thursday 9th, June 9:30am - 10:30am

After decades of brutal war and neglect, Southern Sudan is one of the poorest and least developed regions on earth. With the referendum on January 9-15, 2011 resulting in favour of independence Southern Sudan is set to become an independent state in July. With many internally displaced people returning home to the region it is becoming increasingly important to address the humanitarian situation as it develops. How can aid agencies ensure that those returning home have somewhere to shelter? How can safe food and water be provided to prevent malnutrition and disease? How do agencies reach geographically remote areas and what solutions are necessary to contend with this issue? Lastly how can the safety and well being of individuals be assured in an area that has seen years of unrest and how can a future be created with prospects for independent development?

The following organisations and speakers will bring this situation to life:

True Energy will discuss the Sure Chill™ vaccine refrigerator and the importance of ensuring that expensive vaccines are kept at the correct temperature

FieldWorker Mobile Technology Solutions and **World Vision** will present Last Mile Mobile Solutions - an innovative technology solution for the humanitarian sector that allows for faster and fairer distribution of aid through the digitization and automation of aid delivery processes

Copenhagen Group will show how they provide project and special mission support to international organizations and discuss the challenges they faced in Southern Sudan

BSH Bosch will present the Protos plant oil cooker which provides a clean, safe, sustainable means of cooking and water boiling that can boost the local economy

Greiner Housing Solutions will show how they manage social housing projects through the construction of long lasting, durable, fast to assemble homes

Civil Solutions International will discuss how Civil Affairs methods should be used to create the foundation for moving a newly formed country on the path to sustainable stability

HTI Water will present the Hydropack which uses forward osmosis to create a clean, water based drink with added calories and electrolytes

Omer Ismail, Advisor, Enough Project (Moderator)

Jon Temin, Director, Sudan Program, United States Institute of Peace

Linda Bishai, Senior Program Officer, Academy for International Conflict Management and Peacebuilding, United States Institute of Peace

SPEAKER PROFILES

John Abood

Team Leader/Contracting Officer for the Transportation Division, **USAID**
Session: Feeding development: nutrition and sanitation; Moving mountains: effective transport and logistics; Health & sanitation pitch tank

Working for USAID has afforded John Abood the opportunity to assist individuals in the realms of food aid, disaster relief, famine, early warning systems, banking, health care, airlifts of relief supplies, and infrastructure development. USAID supports long-term and equitable economic growth and advances U.S. foreign policy objectives by supporting economic growth, agriculture and trade, global health, democracy, conflict prevention and humanitarian assistance.

Adnan Ansari

Vice President, **Islamic Relief**
Session: Pakistan experiential zone

Adnan Ansari is the Vice President of Programs at Islamic Relief (IR) USA. Prior to joining IR USA, he has worked in the areas of international development, financial services and management consulting. Adnan specializes in areas of strategic planning, performance monitoring, capacity building, market development and training program development. As a consultant to corporate and non-profit clients he has provided analytical and decision making support in designing policies, formulating strategies and analyzing performance.

Charley Ansbach

CEO, **California Association of Nonprofits**
Session: Partnerships – how to achieve more together

Charley Ansbach has over 30 years experience thinking ‘outside the box’ with time-tested tools and new innovations to solve today’s challenges. He works on major fundraising campaigns, public/private partnerships, social enterprise and corporate partnerships.

**Nathalie Applewhite**Managing Director, **Pulitzer Center on Crisis Reporting**Session: [When disaster strikes: reporting and responding](#)

Nathalie Applewhite is Managing Director for the Pulitzer Center on Crisis Reporting. The Pulitzer Center is a non-profit journalism organization that supports independent coverage of under-reported systemic global issues. Nathalie is an award winning filmmaker who has worked nationally and internationally as a producer, director, and editor; and as a consultant for the UN, and media specialist at the University of Pennsylvania.

**Linda Bishai**

Senior Program Officer

Academy for International Conflict Management and Peacebuilding,

United States Institute of PeaceSession: [Southern Sudan experiential zone](#)

Linda Bishai is a Senior Program Officer in the Academy for International Conflict Management and Peacebuilding, where she focuses on secondary and university education in international relations, conflict resolution, human rights and peace studies. She is responsible for curriculum development and developing faculty and teacher workshops throughout the United States and in conflict zones, especially the Sudan. Before coming to USIP, Bishai was an Assistant Professor of Political Science at Towson University, where she taught courses in international relations, international law, the use of force and human rights.

**Carolyn Brehm**Vice President, Global Government Relations, **Procter & Gamble (P&G)**Session: [Partnering to respond to disasters & emergencies](#)

Carolyn Brehm leads P&G's team of government relations practitioners based in the U.S., Latin America, Brussels, Singapore and China, with responsibilities for public policy and legislative advocacy. She worked for 13 years with General Motors Corporation as Director of International Trade and Investment Policy and project support for GM's international operations in Washington, D.C. In the late 1990's, she served as Vice President-Asia for ORBIS International, and began her career at the U.S. China Business Council. She serves on a number of boards including the U.S. Global Leadership Coalition.

**John Brough**Global Head, Aid & Relief Services Sector, **DHL**Session: [Moving Mountains: effective transport & logistics](#)

John Brough has over 20 years exposure in the humanitarian sector, both as a user and provider of logistical services. John joined DHL in 2004 and has

successfully steered the development and growth of the companies Global Aid & Relief Services. He has direct hands-on experience of handling relief operations around the world, from the famine in Ethiopia, the response to conflicts in Rwanda and Sudan through to the more recent natural disasters of earthquakes and flooding.

J Margaret Burke

Director, Management Services, **Africare**

Session: [Shelter: the big picture](#)

J. Margaret Burke has served as the Director of Management Services for Africare since September 2006. Africare specializes in helping Africa by helping alleviate hunger, building water wells, treating childhood diseases and supporting social empowerment. Prior to Africare, Ms Burke served for more than 15 years as a senior administrator and security executive in both the non-profit and private sectors. She has developed numerous security and risk management programs for various organizations.

Evelyn Cherow

Founder and CEO, **Global Partners United**

Session: [Shelter: ICT for disaster preparedness & development: the state of the art](#)

Evelyn Cherow is founder and CEO of Global Partners United - a woman-owned, public-private alliance and social enterprise committed to 'brain gain', systems strengthening, and capacity building in developing countries via 21st century applications. . With decades of leadership experience managing federal grants and Congressional funding for projects of national and international significance, Evelyn Cherow's extensive executive and senior management experience includes roles in facilitating consensus around evidence-based healthcare and education preferred practices.

Ralph DiTrocchio

Founder & President, **Civil Solutions International (CSI)**

Session: [Complex conflicts: protection and security](#)

Ralph J. DiTrocchio is a former US Army Reserve Special Operations Civil Affairs Soldier with over 15 years of public and private sector experience in the areas of international development and project management. His command of best-known stability theories and applications, along with a vast array of individual experiences, has led to his development of an innovative stability methodology proven effective in Eastern Europe, Middle East, and various parts of the African Continent.

**Joe Donahue**Chief Executive Officer, **iMMAP**[Session: Innovation in information: ICTs, power & energy efficiency](#)

Since iMMAP was founded Joe has served as Operations Officer, Operations Director, and Vice President for Programs. Prior to joining iMMAP, Joe worked in other international humanitarian and development endeavors including USAID and the International Police Task Force (IPTF). Joe has served as an Infantry and Special Forces Officer in the U.S. Army and deployed frequently to the Middle East. iMMAP, is an international humanitarian NGO that pioneered Humanitarian Information Management (HIM) in disaster response.

**Dr. Mary Jeanette (MJ) Ebenhack**President, **Ahead Energy**[Session: Innovation in information: ICTs, power & energy efficiency](#)

MJ Ebenhack has been at the helm of AHEAD since 2004, although her involvement with the organization goes back to 1987. AHEAD Energy is a U.S. based non-profit that assists schools and medical facilities in Africa to harness local energy resources in an economically-sustainable and environmentally conscientious manner.

**David Eby**Program Director, **ShelterBox**[Session: Japan - assesment and current progress;
Japan earthquake and tsunami experiential zone](#)

David currently serves as Program Director for ShelterBox's national affiliate in the U.S., ShelterBox USA. David oversees the North American ShelterBox Response Team (SRT) program which trains and deploys response team members into these disaster zones to ensure the delivery of vital aid to those most affected. David has served as a SRT since early 2007 and has served in regions such as Nepal, Myanmar, Haiti, Indonesia and Japan. David travels and speaks on behalf of SB USA to generate support and visibility for ShelterBox within the USA.

**Alf Ellefsen**Regional ICT Officer for USA, Central and Latin America, **UN World Food Programme (WFP)**[Session: Innovation in information: ICTs, power & energy efficiency;
Establishing harmonized multi-sector ICT disaster preparedness &
development solutions](#)

Having worked for the UN WFP for over a decade, Norwegian national Alf Ellefsen is well accustomed with the huge demands on IT in the humanitarian sector. Since joining WFP for the Kosovo emergency, Alf has held a number of technical and managerial posts and has been involved in many of the major emergency operations since then including Afghanistan, Iraq and Pakistan. Prior to joining WFP, Alf worked in information and telecommunications technology in the private sector as well as with the UN's Department of Peace-Keeping Operations.

Johanna Mendelson Forman

Senior Associate, **Center for Strategic and International Studies (CSIS)**

Session: [Governance and capacity building as a humanitarian imperative](#)

Johanna Mendelson Forman works with the Americas Program at CSIS and with the William E. Simon Chair in political economy, where she works on renewable energy, the Americas, civil-military relations, and post-conflict reconstruction. She founded and co-chairs the Latin American and Caribbean Council on Renewable Energy, LAC-CORE. Her career spans the private and public sectors including the Post-Conflict Reconstruction Project, UN Foundation, the USAID Bureau for Humanitarian Response, the USAID Office of Transition Initiatives, the World Bank's Post Conflict Unit, Association of the United States Army and the U.S. Institute of Peace.

Shamaline Gunawardena

Senior Logistics Officer, **Canadian Red Cross**

Session: [Shelter pitch tank](#); [Health & sanitation pitch tank](#)

Mike McEntire is Director, Program Procurement Policy at the Millennium Challenge Corporation (MCC). He oversees the development and implementation of program-related procurement policy and procedures and monitors the execution of program procurements during Compact implementation. Prior to joining MCC, Mr. McEntire served for more than 23 years with the United States Air Force, both as a civil servant and a military officer.

Deena Guzder

Journalist, **Pulitzer Center on Crisis Reporting**

Session: [When disaster strikes: reporting and responding](#); [Pakistan experiential zone](#)

Deena Guzder has reported on human rights issues across the world. Her work has appeared in Time magazine, Washington Post, and elsewhere. Guzder was awarded a grant from the Pulitzer Center on Crisis Reporting to cover

commercial sexual exploitation in Thailand, and a second grant to cover the epic floods in Pakistan. Guzder is the author of *Divine Rebels* (Chicago Review Press, 2011). She holds advance degrees in journalism and international affairs from Columbia University.

**David Hartshorn**Secretary General, **Global VSAT Forum (GVF)**Session: [GVF disaster preparedness summit](#)

David Hartshorn leads the Forum's efforts to facilitate the provision of satellite-based communications solutions throughout all nations. In particular, Mr. Hartshorn works closely to support national, regional and global-level policy makers as they formulate state-of-the-art satellite regulatory frameworks. He is also responsible for creating greater awareness of the commercial, economic, political and technological advantages that satellite-based communications provide. GVF is a non-profit international that consists of more than 180 members from every major region of the world and from every sector of the industry.

**Terri Hasdorff**Vice President, **The Aidmatrix Foundation**Session: [Feeding development: nutrition and sanitation](#)

Prior to working for Aidmatrix Terri Hasdorff served as the Director for the Center for faith-based and community initiatives at USAID. Her experience at USAID was heavily focused on building public private partnerships, leveraging all sectors of society, including the private sector and civil society, to meet development goals. Aidmatrix helps corporations and humanitarian aid organizations transform surplus food, medicine, and other needed items into humanitarian aid.

**Dr. Barbara D. Hayes**Director, **Millennium Challenge Corporation (MCC)**Session: [Feeding development: nutrition and sanitation](#)

Dr. Barbara Hayes is MCC's Water and Sanitation Subject Matter Expert. She is responsible for implementation oversight for infrastructure components of Compacts in two countries: Mozambique which includes \$380M in water, sanitation and roads projects; and Mali with \$42M in roads, \$181M for rehabilitation and expansion of the Bamako-Senou airport and \$148M for irrigation. She previously served as Director of Infrastructure for the Madagascar Compact with 230 small structures.

Martin Hayes

Child Protection Specialist, **ChildFund International**

Session: [Complex conflicts: protection and security](#)

Martin Hayes has worked in the field of child protection in Africa and Asia for several years with agencies including UNICEF, the International Rescue Committee and Save the Children. In 2004 he joined ChildFund International. His work includes developing and promoting guidelines and training materials to promote children's participation and community-based child protection.

Dr. Lori Heninger

Director, **Inter-agency Network for Education in Emergencies**

Session: [Integrated education: minimizing crises](#)

Dr. Lori Heninger received her BA in education, her Masters from Columbia in Social Work and her PhD from City University Graduate Center in Social Welfare. Lori has conducted assessments and trainings internationally, and has worked as an organizational consultant in the U.S. The Inter-Agency Network for Education in Emergencies is a 5700 member network dedicated to the provision of safe, quality, relevant education for all in times of crisis.

Ted Honcharik

Chairman, **Fuel Relief Fund**

Session: [Japan - assesment and current progress](#)

Ted Honcharik is the chairman of the board for Fuel Relief Fund, a non-profit specializing in providing fuel for disaster relief. He is the owner of Pacific Tank Lines, a large petroleum transportation company that has been awarded Shell and Chevron carrier of the year awards. Ted has extensive experience in all areas of the fuel industry and this expertise has proven essential for organizing fast, cost effective and efficient delivery of fuel to the right areas and organizations following disasters.

Omer Ismail

Advisor, **Enough Project**

Session: [Southern Sudan experiential zone](#)

Omer Ismail was born in the Darfur region of Sudan. He has spent over 20 years working both independently and with international organizations on relief efforts and human rights. Omer fled Sudan in 1989 as a result of his political views. He helped found the Sudan Democratic Forum, a think tank of Sudanese

intellectuals working for the advancement of democracy in Sudan. He also co-founded the Darfur Peace and Development organization. He currently works as Policy Advisor to several agencies working in crisis management and conflict resolution in Africa.

**AI Johnson**

Director for Integrated Information and Communications Technology Support, **US Department of Defence**

Session: [Establishing harmonized multi-sector ICT disaster preparedness & development solutions](#)

Roy A. Johnson is the Director for Integrated Information and Communications Technology Support (IIS) in the Office of the Department of Defense Chief Information Officer (DoD CIO). He has oversight for information and communication technology policy to enable effective information and situational awareness sharing during stability operations, humanitarian assistance and disaster relief missions. Mr. Johnson graduated from North Carolina State University with a B.S. in Zoology and has a Masters of Arts in Management from Webster University.

**Todd Kirkbride**

Senior Alliance Advisor, Office of Development Partners/Private Sector Alliances Division, **USAID**

Session: [Partnering to respond to disasters & emergencies](#)

Mr. Kirkbride is a private sector development specialist whose career ranges from USAID and USAID-funded projects/NGOs to multinational, for-profit enterprises as well as entrepreneurial start-up ventures. He utilizes his vast public and private sector experience to help mainstream the partnership development process for USAID. He is the primary technical advisor for alliance development with the Europe & Eurasia region, while also overseeing partnership trainings, outreach/communication programs, managing the GDA Annual Program Statement and leading the division's involvement with mobile technologies and partnership knowledge exchange.

**Anwar Khan**

VP of Fund Development, **Islamic Relief**

Session: [Pakistan experiential zone](#)

Anwar Khan is Islamic Relief USA's Vice President of Fund Development. He has worked for Islamic Relief for over 16 years. Khan has led various emergency response teams to various crises globally during times of natural disasters and

violence. He has just returned from a recent trip visiting Islamic Relief's projects in Pakistan.

James Lanning

Director of Acquisitions, **International Relief and Development (IRD)**

Session: [Developing finance: transparency and good practice](#)

James Lanning manages global in-kind (GIK) and other support services for IRD's relief, stabilization, and development programs. Mr. Lanning joined IRD in January 2007 from ADRA International, where he served as Director of Acquisitions for 13 years. Prior to working at ADRA, he worked in the development field, including 11 years as vice-president of an architectural/engineering firm specializing in health care.

Vineet Luthra

Founder and CEO, **Privatin**

Session: [Developing finance: transparency and good practice](#)

Vincent has more than 20 years of experience leading and managing large to medium-sized business transformation efforts. His experience has been focused on operational projects in the area of supply chain management, with a particular focus on procurement and sourcing. He has delivered significant improvement for multiple diversified Fortune 500 and Public Sector clients. Before Privatin, Luthra was a Principal at PRTM, a Managing Director, Professional Services at VerticalNet Inc, and a Manager in Ernst & Young's Management Consulting practice. Luthra holds a BS Degree from the University of Delhi, India and a Master's in Business Administration from Carnegie Mellon University.

Paul Margie

U.S. Representative, **Télécoms sans Frontières**

Session: [ICT for disaster preparedness & development: the state of the art](#)

Paul Margie is U.S. Representative for Télécoms sans Frontières and a partner at Harris, Wiltshire & Grannis LLP. Télécoms sans Frontières is a non-governmental organization specialised in telecommunications in emergency situations. Paul is an adjunct professor at the Georgetown University Law Center, is the Co-Chair of the FCC's World Radio Conference Advisory Committee, and is on the boards of DataDyne.org and the MetaCancer Foundation.

Governor Scott McCallum

President & CEO, **The Aidmatrix Foundation**

Session: [Complex conflicts: protection and security; Moving mountains: effective transport and logistics; Japan earthquake and tsunami experiential zone](#)

Governor McCallum, former Governor of the State of Wisconsin, has over 30 years of executive experience leading organizations in the private, non profit, and government sector. He is a co-author of "Managing Technology to Meet Your Mission: A Strategic Guide for Nonprofit Leaders" published by the Nonprofit Technology Network (NTEN) and most recently, "How Technology is Transforming Disaster Relief." Gov. McCallum teaches in the School of Health and Medicine at the University of Wisconsin-Madison.

Jack R. McClanahan Jr.

President, **Ronco Consulting Corporation**

Session: [Governance and capacity building as a humanitarian imperative](#)

Jack R. McClanahan Jr. received his B.S. from Jacksonville State University and earned his Master's degree in Strategic Studies from the US Army War College. In his 27 years with the US Army, McClanahan achieved the rank of Colonel and worked in various capacities including PsyOps, planning and logistics, training, and military security & law enforcement before embarking on a career in the private sector. RONCO Consulting Corporation is a worldwide company with operational capabilities in Demining, Security, Training, Capacity Development, Canine Services, and EOD/IEDD/C-IED.

Mike McEntire

Director, Program Procurement Policy, **Millennium Challenge Corporation (MCC)**

Session: [Health & sanitation pitch tank](#)

Mike McEntire is Director, Program Procurement Policy at the Millennium Challenge Corporation (MCC). He oversees the development and implementation of program-related procurement policy and procedures and monitors the execution of program procurements during Compact implementation. Prior to joining MCC, Mr. McEntire served for more than 23 years with the United States Air Force, both as a civil servant and a military officer.

Dr. Fred Mednick

Founder, **Teachers without Borders**

Session: [Integrated education: minimizing crises](#)

After more than 20 years as a teacher and principal, Dr. Fred Mednick founded Teachers Without Borders (TWB) in 2000. Believing that a commitment

to global education is a universal responsibility, Dr. Mednick has traveled extensively throughout the world and lent his time, skills, and training to onsite development forums. Convinced that education and international development go hand in hand, the key and ultimate vision behind the creation of TWB is to care for the caretakers.

Carla Mendizabal Joffre

Logistics Officer for International Operation, **Canadian Red Cross**
[Session: Shelter pitch tank, ICT, power & energy pitch tank](#)

Carla Mendizabal Joffre works as Logistics Officer for International Operations at the Canadian Red Cross. Her job focuses on the logistics and supply chain for the Emergency Response Unit as well as support for the Canadian International Development Agency. Borne in La Paz, Bolivia she has a Bs. in Commercial Engineering, has been certified CPIM, has a certificate in International Trading with the IHK, and a diploma in Supply Chain Management.

Dave Moser

Vice President, Business Development, **Puralytics**
[Session: Feeding development: nutrition and sanitation](#)

Dave Moser has been involved with applying new technology to solve difficult problems - this has included work from software systems and electronics to complex worldwide manufacturing situations. But water is his most universal and important focus area. His collaboration with Puralytics started several years ago when he was first introduced to the new light based water purification technology. Mr Moser has traveled extensively in Africa and Asia, learning the complexities of development.

Tim Murphy

Vice President Procurement Transformation Services, **Privatin**
[Session: Developing finance: transparency and good practice](#)

Tim has over 14 years of experience saving organizations money and improving operations. His experience has primarily been in cost savings, process improvement, and operational efficiency projects. Murphy has extensive experience in procurement, sourcing, and category management. Over his career, Murphy has delivered significant savings for organizations ranging from Fortune 500 companies to public sector organizations. Murphy's professional background includes time as a Director in PricewaterhouseCoopers Global Procurement BPO unit and time as Head of Strategic Sourcing for Geller Services, a boutique consulting and outsourcing firm based in New York City.

**Ted Okada**Director of U.S. Global Strategic Accounts, **Microsoft**[Session: Partnering to respond to disasters & emergencies](#)

Ted Okada has spent the last thirty years in humanitarian work and has responded to major events from the flood of refugees at the end of the Vietnam war, the famine in Ethiopia, the genocide in Rwanda, the war in Kosovo, the earthquakes in Pakistan, Haiti, and recently in Japan, as well as Hurricane Katrina and the effects of the war in Afghanistan. He currently oversees international public private partnerships for Microsoft in the US.

**Daniel O'Neil**Senior Programs Director for the Caribbean,
Pan American Development Foundation[Session: Haiti, 1.5 years on: lessons learned and current progress](#)

Daniel O'Neil is a civil engineer with over 25 years experience including 12 years on Hispaniola split between Haiti and the Dominican Republic. He was living in the Dominican Republic when the earthquake hit. On the day after the earthquake, he drove to Port-au-Prince and took over management of the Pan American Development Foundation (PADF) Haiti office where he remained for the next five months directing relief and reconstruction operations. He then moved to Washington, D.C. where he now supports PADF's work in Haiti and throughout the Caribbean.

**Mustafa Omar**Executive Director, **Shelter for Life International (SFL)**[Session: Shelter: the big picture](#)

Mustafa Omar has developed, managed and overseen numerous shelter and infrastructure reconstruction projects around the world. SFL has most recently implemented shelter and infrastructure projects in South Sudan and Afghanistan, both with the history of conflict and social instability and located on seismically active zones. Shelter reconstruction has a wide application and impact on economic and social conduct; therefore, SFL believes that shelter is the linchpin of stable societies. SFL has a long history of emergency and transitional shelter construction in seismically active post conflict settings.

**Mark Pearson**Field Operations Specialist, **ShelterBox**[Session: Pakistan floods experiential zone](#)

Mark has worked for ShelterBox since 2004 as a Field Operations Specialist, mainly operating in conflict areas. He has been permanently deployed for

SPEAKER PROFILES

the past 6 years to Pakistan as the Country Manager for ShelterBox, running field operations for in floods, cyclones, war displacement and earthquakes. Prior to this Mark worked in military logistics and as a Photojournalist for the International Press in the UK, Middle East, Central America, and North Africa.

Rachel Pierre

Executive Director, **The Andora Project Inc**

[Session: Haiti, 1.5 years on: lessons learned and current progress](#)

The Andora Project is a not profit organization whose goal is to strengthen Haitian public institutions responsible for child protection in Haiti. Ms. Pierre is a professional licensed social worker who specializes in child protection services. Ms. Pierre is a native of Haiti, with many strong ties to the country. The Andora Project offers structural changes in child protection systems in Haiti for sustained preservation of children rights within and outside of Haitian borders.

Manuel Pietra

President & CEO, **FreeBalance**

[Session: Developing finance: transparency and good practice](#)

Manuel Pietra is a global executive with more than 20 years of successful management experience from companies in the U.S., Canada, Europe, South Africa, and Latin America. Within FreeBalance, Mr. Pietra leads global growth strategies, organizational restructuring and customer engagement. Mr. Pietra has held executive positions on the boards of several international companies and actively participated in the venture capital arena.

Mark Preslan

Regional Director for Asia-Pacific/Middle East/Europe, International Services Department, **American Red Cross**

[Session: Japan - assessment and current progress](#)

Mark Preslan is Regional Director for Asia-Pacific/Middle East/Europe, in the International Services Department of the American Red Cross (ARC). ARC works to help vulnerable people and communities around the world prepare for, respond to, and recover from natural disasters, humanitarian crises, and health emergencies. As regional director, Mark coordinates American Red Cross participation with Red Cross and Red Crescent Societies in their priority programs and activities. In May 2011, Mr. Preslan was with the Japanese Red Cross Society in some of the areas affected by the Great East Japan Earthquake.

**Ty Prettyman**

Director, **ISTAT AirLink Program**

Session: **Moving mountains: effective transport and logistics; Japan - assesment and current progress**

Mr. Prettyman is responsible for overall operation of the AirLink program including recruiting NGOs & airlines, overseeing website improvements and updates, coordinating website training, and running fundraising programs. He assumed these duties in March, 2010.

**Christina Ragsdale**

Head of Communications, **Sacramento Air Quality Management District**

Session: **Partnerships – how to achieve more together**

Christina Ragsdale is a communications professional with extensive experience and training in emergency and disaster communications. She currently leads the communications office of the Sacramento Air Quality Management District, a leader in US environmental management and adaptation issues. Ms. Ragsdale has over 20 years of experience and consulting in leveraging solutions that bring projects and conflicts to successful conclusions through collaboration and building relationships with stakeholders.

**Sergio Ramirez**

Senior Project Director, **AED/Global Education Center**

Session: **Integrated education: minimizing crises**

Sergio Ramírez has 20 years of international development experience focusing on innovations in educational reform, policy dialogue, education management information systems and institutional reform of the education sector in Latin America and Africa. Since 2006, he has been the Senior Program Director for the Equatorial Guinea Education Program and Education Advisor. This program focuses on improving quality of primary education by upgrading teacher skills, improving schools, promoting parent participation and education information systems for policy dialogue and institutional capacity building.

**Jim Ramsey**

President, **MTN Government Services (MTNGS)**

Session: **Public Private Partnerships**

Jim Ramsey is President of MTN Government Services (MTNGS), a subsidiary of MTN Satellite Communications, and is a military veteran with more than 35 years of communications and leadership experience, 26 years of which was spent in the U.S. military. Prior to joining MTNGS, Ramsey held executive positions with

Protections Strategies Incorporated, Verizon Federal Network Systems, PRIME LLC, and Morgan Franklin Corporation. In each company, he was the vice president of government and federal services responsible for the management of sales, customer service, technical operations, and maintenance.

Keith Roberatory

Disaster Services Technology Manager, **American Red Cross**

[Session: Innovation in information: ICTs, power & energy efficiency;](#)
[Domestic perspectives: the American Red Cross Response Strategy](#)

Keith Roberatory oversees all the technology the American Red Cross deploys to disaster relief operations in the US. This includes volunteers and hardware; such as VSATs, satellite trucks, servers, laptops, cell phones, satellite phones, radios, and everything needed to connect it all together.

Ben Sandzer-Bell

Founder & CEO, **C02 Bambu**

[Session: Shelter: the big picture](#)

Prior to founding CO2 Bambu, Sandzer-Bell had a 25 year career in the aerospace industry, as VP of strategy for aerospace majors, such as Boeing in the US and Thales in Europe and Japan. His conversion from aerospace to bamboo housing came as a result of his focus on green aviation and the need for the aviation industry to address its carbon emissions profile. CO2 Bambu is a company dedicated to the dissemination of eco-friendly post disaster reconstruction solutions based on bamboo.

Graham Saunders

Head of Shelter, **International Federation of Red Cross (IFRC)**

[Session: Shelter: the big picture](#)

Graham Saunders specializes in the design, management and technical support of shelter and settlement relief and development programs. An architect with a UK background in project design and management, he has extensive experience of shelter programming. As head of the newly established shelter department within the Secretariat in Geneva, his role is to support the IFRC in building the shelter capacity of the Federation, identifying and promoting best practices within the sector, assisting the emergency shelter coordination role of the IFRC in natural disasters, and promoting a broader shelter network.

Kip Scheidler

Senior Director, Global Disaster Response,
Habitat for Humanity International

[Session: Shelter: the big picture](#)

Kip Scheidler coordinates the Habitat for Humanity network's disaster risk reduction and response efforts around the globe. When disaster strikes, Mr. Scheidler and his team assess the shelter-related needs and then muster the resources available to respond. Mr. Scheidler began working within the disaster response arena in 1998, co-ordinating Habitat's work in Nicaragua, Honduras, El Salvador, Guatemala and the Dominican Republic in the wake of hurricanes Georges and Mitch. After leaving disaster work in 2002, Scheidler assumed his current position in early 2009.

Shruti Shah

Senior Policy Director, Law and Regulation,
Transparency International USA

[Session: Developing finance: transparency and good practice](#)

Shruti Shah is responsible for the promotion of TI-USA's anti-corruption law and regulation policy agenda. In this capacity, she develops and implements advocacy campaigns and builds strategic partnerships with international organizations, senior government officials and private sector and NGO representatives to ensure that laws against bribery and corrupt practices, and favouring transparency, are implemented and effectively enforced.

Sharaf Sharfuddin

CEO, **Muslim Aid**

[Session: Complex conflicts: protection and security](#)

Sharaf Sharfuddin joined Muslim Aid in 2010 and is responsible for the leadership and strategic direction of the charity in delivering humanitarian assistance and sustainable development projects to poor and vulnerable communities in over 53 countries in consultation with Muslim Aid's donors and partners. Mr Sharfuddin has spent nearly three decades practicing diplomacy and promoting international co-operation, peace, democracy and development.

Joe Simmons

Global Program Director, **Nethope**

[Session: ICT for disaster preparedness & development: the state of the art](#)

Prior to joining NetHope in 2003, Simmons worked for Bell Labs for over 20 years and held a variety of technical management positions. NetHope aims to be a catalyst for collaboration in the International NGO community and

enable best use of technology for connectivity in the developing parts of the world.

Meredith Sisa

Acting Director, Office of Humanitarian Assistance, **CHF International**
[Session: Shelter: the big picture](#)

Meredith Sisa has been a leading member of CHF's emergency response team since 2006, specializing in humanitarian program design, emergency management and coordination, the provision of technical assistance and management support to humanitarian programming. She has also acted as field-based management for emergency shelter and livelihoods programs, most recently in Padang, Indonesia (2009) and post-earthquake Haiti (2010). Ms. Sisa has supported development and humanitarian initiatives in nearly 20 countries, including: Ethiopia, Georgia, Pakistan, Zimbabwe, and Afghanistan.

**Steve Summers**

CEO, **Key Travel**
[Session: Complex conflicts: protection & security](#)

Steve Summers, 43, is the CEO for Key Travel, a leading travel management company supplying the global humanitarian and NGO community. Steve joined Key Travel in 2007 and as well as the development of their 'traveler welfare portfolio', designed to help NGOs manage the safety and security of their traveling employees, has been responsible for bringing the unique Key Travel service proposition to the U.S.

**David Sweet**

Executive Director, **World Alliance for Decentralized Energy (WADE)**
[Session: Innovation in information: ICTs, power & energy efficiency](#)

Prior to joining WADE, David Sweet served as a Director of the United States Energy Association, the U.S. arm of the World Energy Council, as Executive Director of the International LNG Alliance, Vice President of the Independent Petroleum Association of America, an attorney in private practice, and as an expert witness on financial, rate and permitting issues at the Federal Energy Regulatory Commission.

**Jon Temin**

Director, Sudan Program, **United States Institute of Peace**
[Session: Southern Sudan experiential zone](#)

Jon Temin is the director of USIP's Sudan program. He travels to Sudan frequently to assess developments and meet with government officials,

civil society leaders and international actors. Prior to joining the Institute he spent five years with the NGO CHF International designing development and peacebuilding programs throughout Africa and elsewhere. He has working experience in more than a dozen countries across Africa, Latin America and Eastern Europe.

Andy Thorburn

Founder, **Global Benefits Group Foundation (GBG Foundation)**

Session: [Developing finance: transparency and good practice](#)

Andrew Thorburn is a well known entrepreneur and former educator, who has operated globally for many years and been acutely aware of the lack of access to essential equipment and materials in developing countries, particularly in the fields of healthcare and education. GBG Foundation is the realization of his vision to make a difference and create a Gifts in Kind (GIK) focused nonprofit dedicated to improving access to essential goods in places of need. An outspoken advocate of corporate responsibility Mr Thorburn continues to serve as President and CEO of GBG Foundation.

Dominique Toussaint

Chairman of the Board, **Mobilize for Haiti**

Session: [Haiti, 1.5 years on: lessons learned and current progress](#)

Mr. Toussaint is Chairman of the Board of Mobilize for Haiti. A not-profit organization formed to dramatically increase Haiti's emergency preparedness, to build a 911 style emergency dispatch system and to promote adoption of a national emergency plan for the Republic of Haiti. Toussaint was appointed Manager of The Command Center at the Embassy of Haiti by Ambassador Raymond Joseph. He is Vice President of the Board of The Haiti Renewal Alliance and a member of the Haiti Redevelopment and Reconstruction Task Force.

Elliott Verreault

Founder, **It'sonehumanity.org**

Session: [Innovation in information: ICTs, power & energy efficiency](#)

As an entrepreneur and humanitarian, Elliott Verreault believes we need to foster a greater sense of accountability in everyday people for the human condition worldwide. In the belief that 'a better world' demands for more humanitarians, Elliott and his team at It'sOneHumanity launched The Humanitarian Social Network in February 2011 to democratize humanitarianism and provide a space for humanitarians to educate, share, connect and act. Mr. Verreault hopes to generate intergenerational learning between the current generation of aid workers and the next.

**Jessica Vogel**

Manager of Operations, **International Stability Operations Association (ISOA)**

Session: [Governance and capacity building as a humanitarian imperative](#)

Jessica Vogel facilitates committees, develops programs and events, coordinates government affairs efforts and manages communications and outreach. She is also the Editor-In-Chief of the bi-monthly Journal of International Peace Operations (JIPO), the worlds only publication devoted to the study of the private sector's role in peace and stability operations worldwide. Jessica volunteers as the Director of Membership and Events for the young professionals program of the United Nations Association of the National Capital Area (UNA-NCA) and also serves on the membership and planning committees.

**Robert Wells**

Governance Consultant, **Whitney, Bradley and Brown, Inc.**

Session: [Governance and capacity building as a humanitarian imperative](#)

Robert Wells retired from the U.S. Navy after 30 years as a Captain after commanding the AEGIS cruiser USS LAKE CHAMPLAIN (CG-57) after 9/11 during Operation Enduring Freedom. His Washington assignments included Pentagon service on the staff of the Chief of Naval Operations' Plans, Policy and Strategy branch responsible for Middle East-Africa Affairs, assignment to the U.S. Department of State's Bureau of Political-Military Affairs as a Special Advisor and as Special Advisor on the National Security staff of Vice President Dick Cheney, responsible for Africa, Western Hemisphere and Defense Policy.

**Dr. Inka Weissbecker**

Global Mental Health and Psychosocial Advisor,
International Medical Corps

Session: [Japan - assesment and current progress](#)

Dr. Weissbecker provides assistance and support in assessment, program development, design, project implementation, and evaluation of mental health and psychosocial programs globally. She completed her MPH at the Harvard School of Public Health and has a PhD in Clinical Psychology specializing in health psychology and policy from the University of Louisville. She has served as an NGO representative of the International Union of Psychological Science to the UN and has published on stress and global mental health.

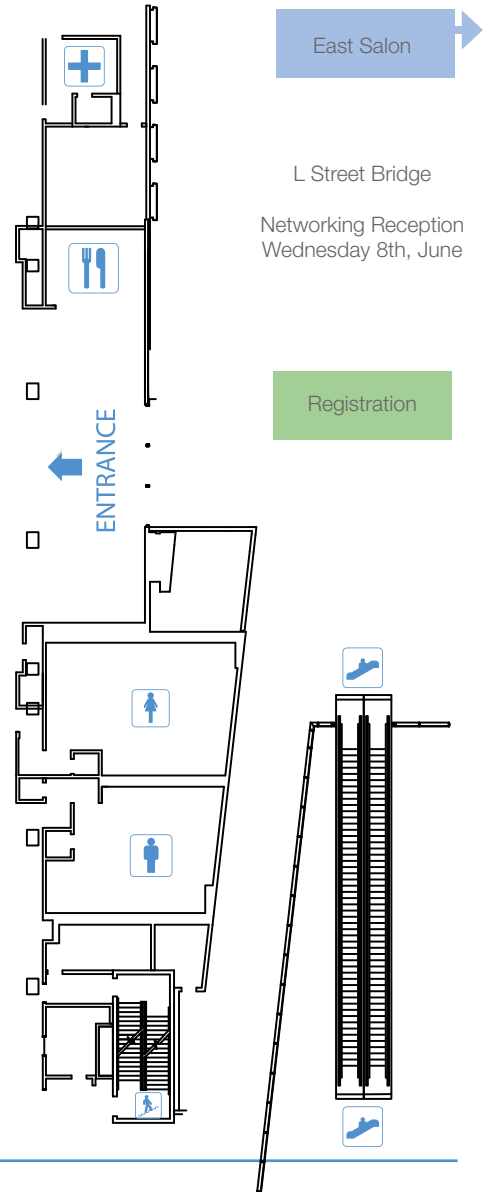

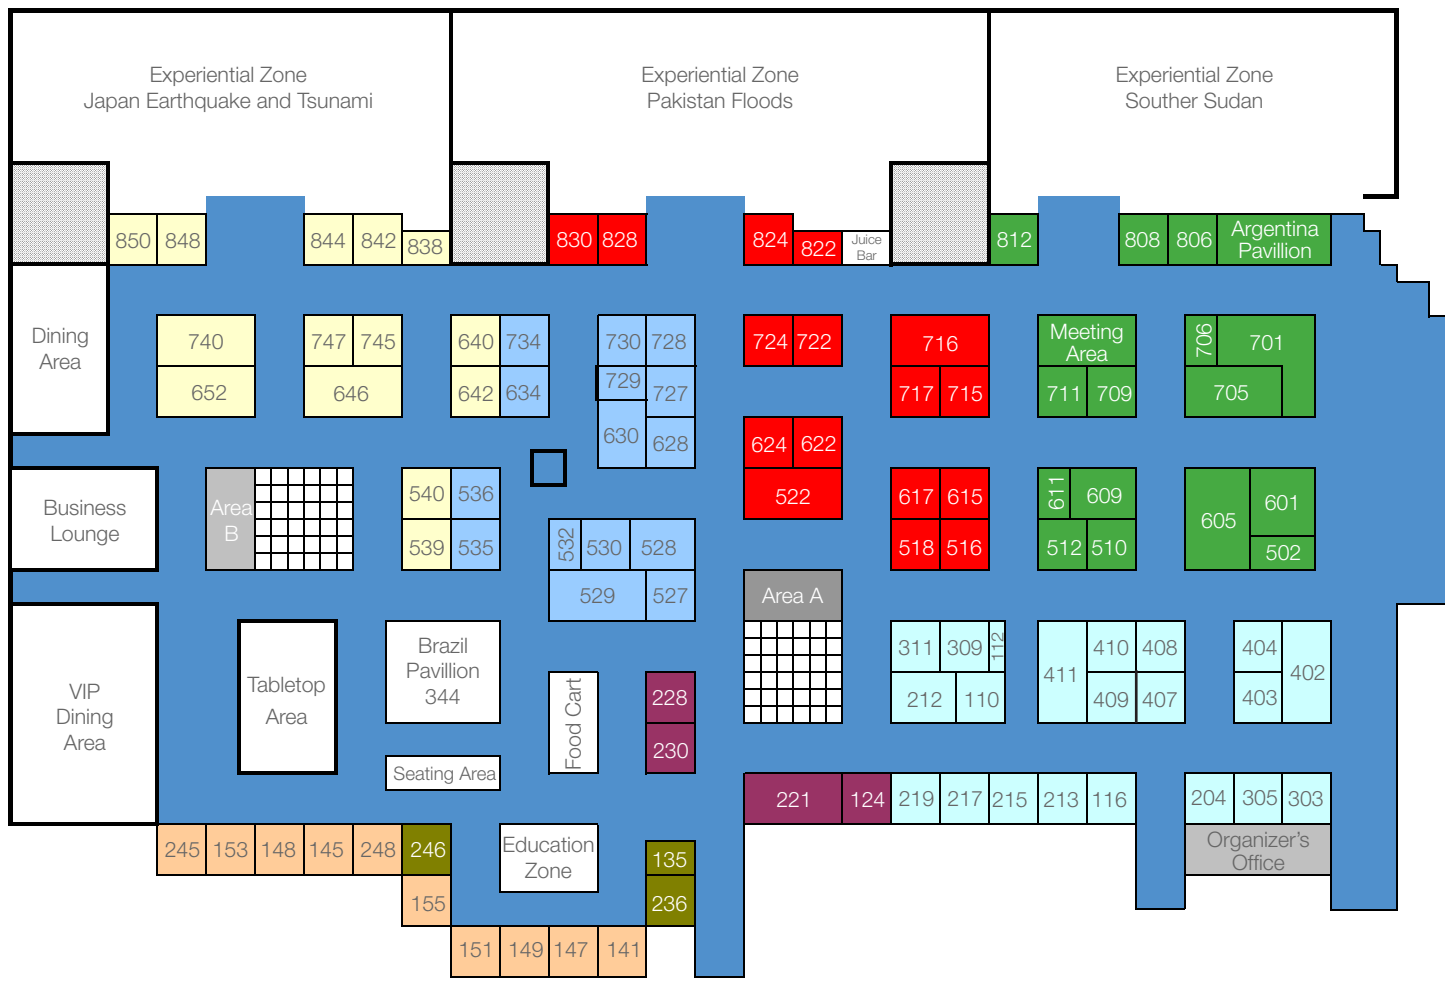

Delivering effective international development solutions to improve economic, social, and environmental welfare around the globe.
