

techsoup

we bridge civil society organizations & changemakers around the world to technology resources by collaborating with a global network of 60+ partner ngos

tech donations
& discounts

ngo validation data
& resource matching

training & capacity
development

convening
events

tech consultancy
& support

big data?

lets get started
on our data &
knowledge
sharing journey

The cloud & disaster preparedness

Collaboration and sharing

online & offline collaboration

CRM & ERP

the big jump

bringing
people along

collaboration internally & externally
it's a journey after all

cloud
solutions to
consider

Some big
data tools all
of us can use

Power BI

Google Trends

what are our big data plans?

through the 700,000+ NGOs in our database, we are able to:

develop a platform for scaling
apps for the development sector

insights & analytics of the
dataset driving the solutions

Cooperative Technology Platform

Enabling people and organizations to securely exchange resources, connections, and value to change the world.

- APIs and easy-to-use drop-in widgets make it easy to build powerful new web applications for social good and impact.
- Analyze data on the NGO sector. Use this data to connect, collaborate, and build community with over 700,000 NGOs globally.
- Target specific issue- or geographic-based organizations. Build social sector capacity in specific priority areas.
- Run challenges. Using proven approaches, such as generator sessions and hackathons, test social innovations against vetted CSO needs and reach targeted markets.
- Localize the market and deploy social goods and services. Move beyond the exchange of ideas to the distribution of social good products, apps, and services, which can be localized for 236 countries and territories and across 30 languages through TechSoup's proven partner network channel.
- Integrate high-level validation and verification procedures into programmatic activity.
