

**Protecting vaccines,
even without power.**

SURECHILL | COOLING
TECHNOLOGY

Groundbreaking.

**Sure Chill is patented,
pioneering cooling technology.**

Our vaccine refrigerators are changing lives around the world.

Sure Chill is built around the unique properties of water, allowing us to cool at a perfect 4°C, even without power.

The problem.

Approximately \$750 million worth of vaccines are lost annually due to improper refrigeration in developing countries.

That's around 151 million vaccines.

Eliminate the waste. There's a smarter, safer way.
The Sure Chill way.

Revolutionising the cold chain.

Sure Chill vaccine refrigerators are completely unique, revolutionising the cold chain.

No other vaccine refrigerator in the world has the combination of temperature stability and unfailing cooling without power.

Our robust and reliable technology ensures cooling that doctors, nurses and patients can depend on, even in the event of a power cut.

Sure Chill is different.

Holdover time*

Sure Chill – 134 hours
Competitor A – 81 hours

New standards of performance are now required by all vaccine refrigerators, because of what Sure Chill has been able to demonstrate as possible.

- Temperature Stability
- Freeze-free guarantee
- No power? No problem

Our products.

All of our products exceed the most stringent standards set by the World Health Organization.

Sure Chill medical refrigerators are already saving lives in 44 countries.

14 models of refrigerator, available in sizes from 30 litres to 200 litres.

THANK YOU

**Come and visit us at stand 12 to see
our revolutionary technology for
yourself.**
